KeraStat® Cream is intended to maintain a moist wound environment. KeraStat® Cream is indicated for the management of a number of partial thickness skin wounds such as partial thickness (first and second degree) burns, severe sunburns, superficial injuries, cuts, abrasions, and incisions/surgical wounds. Under the direction of a healthcare professional, KeraStat® Cream also may be used in the management of dry, light, and moderately exuding partial thickness wounds including pressure (stage I-II) ulcers, venous stasis ulcers, ulcers caused by mixed vascular etiologies, diabetic ulcers, radiation dermatitis, donor sites, and grafts. Please refer to the KeraStat® Cream package insert or visit www.keranetics.com/CreamPackageInsert for a downloadable version of the device package insert.

KeraStat® Cream is not indicated for full thickness (third degree) burns. This device is only available by prescription.
